

Abstract

An adhesive sheet strip for a redetachable bond, removable from a joint by pulling in the direction of the bond plane, having a nonadhering grip tab and a subsequent single-sidedly or double-sidedly adhering strip, which comprises of:

- a) a backing composed of a film having a tensile strength of 2-20 N/cm and an elongation at break of 200 - 800%, and
- b) applied to at least one side thereof, a polyurethane-based adhesive comprising:
 - 60 - 80% by weight of an aliphatic isocyanate/polyol crosslinking system,
 - 15 - 35% by weight of a filler, and
 - 0.05 - 0.20% by weight of an activator, based on the total weight of the adhesive.
